**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election with traverse of claims 1-7 in the reply filed on 08/26/2008 is acknowledged. The traversal is on the ground(s) that no adequate reasons and/or examples have been provided to support a conclusion of patentable distinctness between the identifiable groups. This is not found persuasive because the Restriction Requirement made by Examiner Koslow was proper based on USPTO practice. However, the Examiner will consider rejoining the claims at the close of prosecution.
2. The requirement is still deemed proper and is therefore made FINAL.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 3-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point

out and distinctly claim the subject matter which applicant regards as the invention. In claims 3-6, the Applicants use the term "W/O type (water-in-oil type)." Description of "type" is properly set forth in the specification rather than the claims. If stated in the claims, "type" leads to confusion over the intended scope of a claim. Therefore, each occurrence of "type" should be deleted and the parenthetical language should be deleted.

5. Claims 1-2 are allowable. The closest prior art is Toenjes et al., U.S. Patent No. 5,102,580 (hereinafter "Toenjas"). Toenjes teaches an emulsion composition comprising a blend of block copolymers in water/oil mixtures. See Toenjes, Abstract; col. 1, line 59 through col. 2, line 54. The two copolymers each contain EO-PO; however, the first polymer contains bishydroxyalkyl ether and the second polymer contains 2-amino-2hydroxymethyl-1,3-propanediol. See Toenjes, col. 3, lines 9-62. The difference between the current invention and Teonjas is that the current invention requires a sulfonated polymer soluble in water.
